

etc... is a label for products designed and made in Berlin, in collaboration with artists and craftsmen, with a focus on nomad urban lifestyles.

Story:

etc... was initiated in 2007 by Kixberlin design studio.

Kixberlin approach was to design and produced small products in addition to the design studio activity. Each product is a new experience of collaboration with an artist and a new material.

- In 2007 creation of Kissen
- In 2008 creation of USBéton
- In 2009 etc... is online : www.ectberlin.com

Other products coming soon...

Products:

1. **Kissen** is a pillow for travels combining the functionality of a pillow and a bag. It can be used in the bus, the train, the plane, in a park or in bed.

Made out of high quality fabric and leather, this soft product is available in two different colors. Design by Kixberlin.

2. **USBéton: engrave your data in concrete.**

USBéton is a contemporary fossil; it contains precious informations from our time. Like an architectural building, a USB stick is about space and storage capacity. Like an architectural building, USBéton is made out of concrete. Design by Kixberlin
